

Security Review For Centrifuge

Collaborative Audit Prepared For: **Centrifuge**
Lead Security Expert(s): **0x52**
Date Audited: **August 26 - August 27, 2026**

Introduction

Deterministic CREATE3 deployments across chains, authorised by one key and sent by another.

A multi-chain deployment is signed transaction by transaction by the account every deployed address derives from. Fifty contracts across ten chains is five hundred transactions from that one account, which is more than a cold key can realistically sign, and sharing it means everyone holding it can deploy whatever they like.

The gate splits that in two. A cold key commits what may be deployed, one transaction per chain independent of the contract count. A hot key then sends every deployment, and can produce nothing but what was committed: the same init code, at the same addresses, in the same order, or it reverts.

Scope

Repository: `centrifuge/create3-gate`

Audited Commit: `41e0f70db52f9f06747942625cf5b74f03184c8d`

Final Commit: `3a1b90e43e00655bcf54b0d721467109c42b19c0`

Files:

- `script/DeployGate.d.sol`
- `script/DeployGateScript.sol`
- `src/Create3.sol`
- `src/DeployGate.sol`

Findings

Each issue has an assigned severity:

- High issues are directly exploitable security vulnerabilities that need to be fixed.
- Medium issues are security vulnerabilities that may not be directly exploitable or may require certain conditions in order to be exploited. All major issues should be addressed.
- Low/Info issues are non-exploitable, informational findings that do not pose a security risk or impact the system's integrity. These issues are typically cosmetic or related to compliance requirements, and are not considered a priority for remediation.

Issues Found

High	Medium	Low/Info
0	0	0

Issues Not Fixed and Not Acknowledged

High	Medium	Low/Info
0	0	0

No issues identified

No issues have been identified during the review of the centrifuge/create3-gate repository. The final report has been signed off on by the Security Researcher and the Head of Audits.

Disclaimers
